

TALES OF GOTHAM AND OTHER CITIES

When Frank Tokio Stepped on Hans Olson's Foot

SAN FRANCISCO.—For a long, long while Frank Tokio was a negligible quantity in the trial. This was somewhat strange because he stood in a very prominent place. That is, within a few feet of the witness chair, a point toward which spectators' eyes most frequently focus. It was also strange on account of his striking appearance.

Tokio was not more than four feet tall. His head was large and intellectual looking, with bulging forehead and well rounded dome. He stood with his arms folded, gazing at the witnesses in a pose which suggested to many Napoleon standing on the knoll overlooking the battle of Waterloo.

He was a joint defendant with Hans Olson. He and Olson were charged with disturbing the peace and the arresting officer testified that the two had fought terribly on an Ocean Beach car.

Olson was a giant, towering up so high that it seemed Tokio came only to his knee. Perhaps it was the mighty Olson form which protected the diminutive Tokio from the blast of curious eyes and caught their force in the same way a lightning rod catches the electric current and grounds it harmlessly.

"Yo say," explained Olson, "das little fellow he got my goat. Hay ban stap on my foot in car an' walk on my foot an' Ay ban tol' him Ay got corn."

"He grabbed up the little fellow and threw him off the car," testified the policeman. "But he grabbed hold of the big fellow's foot and pulled him off, too. They rolled around on the ground and finally the little chap began to tie up Olson, using his arms and legs as ropes. Olson then grabbed the Japanese by the neck and tossed him up like a football."

"Hay ban prettay strong fellow," said Olson.

"What was all this about anyway?" asked Judge Shortall, gazing keenly at Tokio. "I guess you better call Mr. Gaffney, the Japanese interpreter," added the judge, speaking to Bailiff Brodt. "I don't suppose this man understands a word of English. What for you too much fight?" asked Judge Shortall again.

Tokio, the midjet, stepped up on the dais and leaning confidentially toward the magistrate winked a very significant and intelligent wink. "You know," said he in excellent English, "it was the result of too much sake."

"Where in the world did you find your voice?" asked the judge in astonishment.

"It would be unjust to punish this man here," continued Tokio, indicating Olson, who now gazed in bewilderment at the little foreigner, who had suddenly developed into such a linguist.

"It was really not his fault at all," continued Tokio. "I have a very dim recollection of swinging some heavy object around my head. I presume it must have been my fine friend here. If I injured him I am sorry. I presume he been excited."

"I thoroughly understand, Mr. Tokio," said the judge. "I will have to dismiss the case against Olson on account of your statement. I will have to dismiss the case against you, also, on account of your noble magnanimity."

MRS. LINDSEY AS ASSISTANT JUVENILE JUDGE

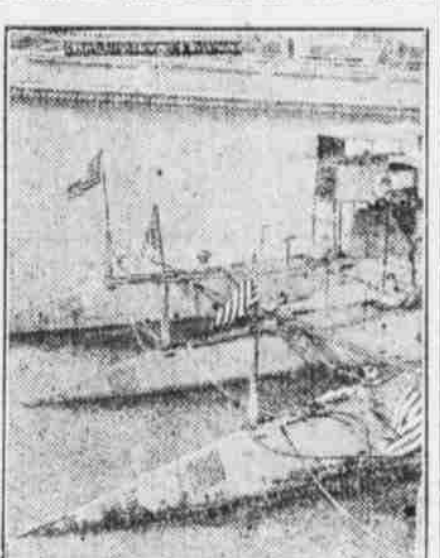

Judge Ben B. Lindsey of the Denver juvenile court has made his young bride his "assistant judge," and they are here seen sitting together on the bench, hearing the cases of delinquent children. Mrs. Lindsey loves children and takes great interest in the work.

JULES VERNE'S DREAM BECOMES AN ACTUAL WORKING REALITY

Wonderful Performances of Submarines Surpass That of the Modern Nautilus—Only a Transoceanic Voyage of Under Sea Craft Now Would Create Amazement—Vessels Are Run Just Like Other Ships.

New York.—Until the last year United States submarine boats were known by the names of fish—the Grayling, Salmon, etc. But now, following the fashion of England, France and Germany, a letter designates the class of the type and a number its individuality; thus the Grampus is now the A3, while the newer boats being built will be the H6 and H11 and H12. No wonder

Submarine Flotilla to Guard Pacific Entrance to Panama Canal.

the poet wondered how their glory will be remembered.

The submarine boat is the least prepossessing of all craft on the sea. "Imagine a big fat cigar floating on the water," is Henry Reuter's description, "with a hump on its middle and two sticks pointing upward." The hump is the conning tower and the sticks are the "eyes" of the boat, known as periscopes. A narrow strip of flat deck and a flagstaff aft, supporting the radio aerials, complete the submarine's features.

On the surface the submarine boat runs just as any other ship. The commander in the conning tower conns his ship just as the captain of a battleship or a liner would from his bridge. Steering is done by an ordinary wheel. The rudder and propellers are no different. Gasoline is usually the motive power. Heavy oil is used in the latest types. A speed of 20 knots an hour is made by the newer models, which are about 500 tons in displacement.

Under water some changes come. The same propellers and rudder serve. The steering wheel still turns the boat to right and left; but another wheel is also used which controls horizontal rudders, which guide the boat up or down. Electricity is now used to turn the motor that controls the propellers. After a few minutes the used air is gradually pumped into the sea and compressed air from storage tanks released to replace it.

When the boat dives it is forced down by its ordinary propelling machinery, and does not sink, as many believe. The horizontal rudders are tipped down, after all hatches are closed, and the boat glides under the

surface. The traveling radius of the submarine is much larger than popular conception. A Swedish boat recently went from Italy to Sweden without stopping. A flotilla of United States boats visited Bermuda and others went from New York to Panama, where they now form a part of the canal defense. The boats in the Pacific travel from Puget sound to San Francisco to San Diego. The newer boats remained under water for 24 hours, some 48 hours, without inconvenience to the crew. The best speed under water is about eight knots an hour. They can dive to a depth of a hundred feet or more in safety. Some of the latest types are designed for 200 feet depths and an underwater steaming radius of several hundred miles.

formed as to his depth. If 15 feet or less down he can see through his periscope. Below that the submarine is "blind." It must steer by compass.

In was a submarine acting singly would travel under water and make short rises to peek through its periscope. A system lately tried and found practical was for three submarines to work together, one below the other. The top one carried its periscope above the surface and directed the two below by submarine signals. Thus only one was in danger of being destroyed by an enemy.

VERY RICH WOMAN STARVES

Pathetic Tragedy of a Feminine Reluctance Undiscovered for a Week.

London.—Evidence given at a Woolwich inquest on Miss Martha Moody, who lived alone in a house in Heathwood Gardens, Charlton, showed that she starved herself, although she was a woman of means.

Mr. Charles Clothier, a friend of Miss Moody, said he had not seen her about for some days, and as the blinds remained down, he informed the police. An entrance was made through a back door, and Miss Moody was found dead in her bed.

Doctor Webber, police divisional surgeon, estimated that she had been dead about a week when the tragedy was discovered. She was very emaciated, and he found very little food in the house. Death was due to heart disease, accelerated by self-neglect.

A brother of Miss Moody said there was no reason why his sister should have starved herself. Her bank pass-book, which he produced, showed a large balance.

A verdict in accordance with the medical evidence was returned.

TO SAVE OLD INDIAN TOWN

North Dakota Historical Society's Head Starts a Movement for Their Preservation.

Grand Forks, N. D.—Dr. O. G. Libby, head of the North Dakota Historical society, has commenced a movement with the object in view of preserving the historic Indian villages of the state, notably that on Graham's island, Benson county, which is now regarded as the oldest Indian village in the state and possibly the oldest in the northwest.

In his effort to interest the people in the project Mr. Libby has resorted to the moving picture theaters, and is sending slides to all sections of the state for use in creating favorable sentiment to the establishment of a portion of Graham's island as a state preserve.

The Graham's island village was established by the Hidatsa Indians, and researches which have been carried on indicate it is the pioneer of all Indian villages.

Dr. Libby also hopes to preserve several Indian villages in the Missouri slope district.

MILLIONAIRE'S WIFE IS A COP

Wealthy Woman's Object in Donning Blue Coat Is to Safeguard Girls of Muncie, Ind.

Muncie, Ind.—Mrs. Thomas F. Hart, wife of a millionaire manufacturer, has gone on duty for the first time as a policeman by appointment of the mayor, Dr. Rollin H. Bunch and the board of safety. The appointment is a popular one, being approved by various organizations of women.

Mrs. Hart's purpose in becoming a policeman is to endeavor to better condition in Muncie for girls, she said. She has adopted a uniform that is distinctive. "Though I am wearing a uniform," said Mrs. Hart, "you may be very sure the uniform is wholly feminine in its appearance."

Mrs. Hart desired to be clothed with full police authority, because she believes it may be necessary for her to look after male offenders, as well as women. Though in the matter of actually arresting a man Mrs. Hart might not be especially vigorous, she desires, she says, to be in a position to see that the laws of decency be enforced against men as well as women.

Woman's Hair Burned From Head. Metcalf, N. J.—Mrs. Michael Sumsky fell asleep beside a stove. Her celluloid comb caught fire and she awoke to find her hair gone, scalp burned and clothes ablaze. She will recover.

Freak Law Proposed. Jackson, Miss.—A bill, proposing to execute any person who takes a drink in Mississippi and give his body to medical students, was introduced in the assembly.

Thief Steals Funeral Crepe. Canton, O.—While the body of William Burns rested in a room just inside, a thief stole the funeral crepe and ribbon on the door.

The pig finally broke one of the bulldog's legs between its jaws just as it was becoming so exhausted that it could not have fought much longer.

Steam Heat Fatal to Beauty. Washington.—The only thing that prevents American women from being the most beautiful in the world is the effect of steam-heated rooms on their complexion, says Alvin Williams, noted English painter.

MADE YOUNG MOTHER WORRY

Something Surely Was Wrong With Baby According to Her Lament to Friends.

Anybody could see with half an eye that the young mother was worried. Her efforts to conceal it were futile. "What is it?" they asked sympathetically. "Is anything the matter with baby?"

"O, yes!" half sobbed the gentle creature. "It's all about baby. I am so concerned about him."

"Is he sick?"

"No. At least, not yet."

"Has he met with any accident?"

"O, no."

"Has he developed any undesirable traits?"

"No, no, no. None of those. It's worse than any of those, and it's worrying me to death. Baby is three years old—here the young mother stifled a sob—and he wears only three-year-old sizes in everything!"

Only One "BROMO QUININE"

To get the genuine, call for full name, LAXATIVE BROMO QUININE. Look for signature of E. W. GROVE. Cures a Cold in One Day. 25c.

Quite Natural.

A traveler was riding on muleback through a very wild and turbulent region where human life was among the cheapest of commodities. Noticing a cross surmounting a heap of stones by the roadside, he asked his guide what it meant.

"That is a grave," said the guide. "It means that the man died on that spot and was buried there."

"Indeed," remarked the traveler, "and how did he die?"

"He died a natural death, sir."

"What do you mean?"

"He was shot."

IF YOU'RE GROUCHY

It is likely that your liver needs stirring up. Wright's Indian Vegetable Pills will set you right quickly. Adv.

An Idea of Bliss.

Teacher—Now, little girl, I have told the class about the wicked place being paved with good intentions. Now, what do you suppose heaven is paved with?

Little Girl (with a delightful recollection of a fresh air picnic)—Ham sandwiches, bananas, an' pie.

Many School Children Are Sickly.

Children who are delicate, feverish and cross will get immediate relief from Mother Gray's Sweet Powders for Children. They cleanse the stomach, act on the liver, and are recommended for complaining children. A pleasant remedy for worms. Used by Mothers for 24 years. At all Drug Stores. See sample box. Address, A. S. Olmsted, Le Roy, N. Y. Adv.

Fate the Scapegoat.

"Rogers is always grumbling against fate."

"Yes, he has to blame his incompetence on something."—Boston Evening Transcript.

No Stringed Instrument.

"Do you play yourself?"

"No," replied the Boston maiden, frigidly. "I play the piano."

Some men try to console themselves with the thought that they could be better if they tried.

Marriage is a tie, which may account for the fact that so many felons are roped in.

Drive that cough from your system. Dean's Mentholated Cough Drops will surely help you—3c at all Drug Stores.

Horses and Cards.

"Why is it you always win at poker?" she asked. "and always lose when you back horses?" "Well, my dear," came the genial response, "I don't shuffle the horses."—London Express.

Red Cross Ball Blue, all blue, best bluing value in the world, makes the laundress smile. Adv.

Only Cuts.

"Does the razor pull, sir?" asked the barber.

"No," replied the victim, as he squirmed in his chair, "but the blood running down my neck kind of tickles me."

Corner Repartee.

The man with the "I Am Blind" sign on his breast smelled of gin, but he looked pathetic. I stopped in front of him. He held out his tin cup. I had my suspicions.

Eying him carefully I drew from my pocket a large roll of bank bills. I saw him shudder.

"It is the chilly breeze," he hastily explained.

I wasn't satisfied.

"Come," I said, "if you leave this corner and go somewhere else I will give you a bank bill."

"Sure, I will," he eagerly replied.

"Taking a \$1 from the roll, I put it in his hands.

"Thanks for the dollar," he said as he picked up his stool.

My suspicions rushed back.

"How do you know it is a dollar?" I demanded.

"I was sure you would give me the smallest bill you had about you," he said, and shuffled along.

I think he had me there.—Cleveland Plain Dealer.

Don't cast slurs unless you are prepared to reap a boomerang.

Pursuit of Alley Cat Proves Undoing of Nero

BALTIMORE, MD.—Nero, the big, black German wolfhound said to be worth \$500, is dead. He was the property and pet of Mrs. Gretchen Lebb, 1901 Braddish avenue. He met his death while chasing a cat that was found trespassing in the Lebb yard.

The yard surrounding the Lebb home is inclosed with an iron fence. Nero, in full pursuit of a cat that had come within invitation into his own domain, made a spring over the fence. He had many times before negotiated the hurdle without a spill. But this time he slipped on a bit of ice as he jumped.

He was impaled on the fence. His whines brought his mistress to his assistance. In his anguish Nero bit her severely, his teeth going through the flesh of her hand. Dr. F. L. C. Helm, 2757 West North avenue, was called to dress the wound, and Patrolman Stevens was notified of Nero's position.

As soon as Patrolman Stevens arrived he called the Society for the Prevention of Cruelty to Animals. The dog hung suspended on the fence with the iron palings through his breast. He made no outcry, but all attempts to release him or to help him were met with snags and growls.

Mrs. Lebb asked Officer Stevens to shoot the dog and end its misery, but the officer urged her to wait until the Society for the Prevention of Cruelty to Animals' agent arrived.
